January 2026

■ **SUGAR SPOTS...**

Congress may not pass a new farm bill in 2026 due to deep political divides. President Trump's 2025 budget slashed SNAP funding by \$186 billion and increased farm subsidies by \$60 billion.

A Trump administration crackdown on foreign truck drivers could take tens of thousands of truckers off U.S. roads. Some companies say the measure could reverse a prolonged downturn in the trucking industry.

Archer-Daniels-Midland Company will pay a \$40M civil penalty after the SEC found the company and three former executives guilty of accounting and disclosure fraud. According to the SEC, ADM's Nutrition segment performance was materially inflated through improper "adjustments" from 2019-2022, including retroactive rebates and price changes not offered to third-party customers.

■ **WASDE... JANUARY 2026 WASDE REPORT**

SUGAR: The U.S. sugar supply is projected to increase marginally as increases in production more than offset a reduction in imports. Sugar production is projected at 9.381 million short tons, raw value (STRV). Based on processor forecasts in the January Sweetener Market Data (SMD), cane sugar in Louisiana is projected at 2.197 million STRV (up 35,377 over December) and Florida is unchanged at 2.082 million STRV. Based on January NASS forecasts of sugarbeet production, beet sugar production is projected at 5.102 million STRV, a small increase of 3,648. Beet pile shrink is the same as last month as forecast by processors at 8.66 percent. Analysis of beet slice recovery through November supports a projection of the season-long recovery very close to the 10-year average of 14.80 percent used in previous *WASDE* projections and is also close to the processors' forecast of 14.95 percent in the SMD. Imports are reduced by 33,591 STRV to 2.255 million, mostly on a reduction in the sugar equivalent of molasses imported by refiners as an input in the refining process. U.S. sugar use is decreased by 50,000 STRV on lower shipments of sugar to be exported to Mexico. Deliveries are unchanged. Ending stocks are residually projected at 1.922 million STRV for an ending stocks-to-use ratio of 15.75 percent, up from 15.24 last month.

Mexico sugar production is projected at 5.047 million metric tons (MT), an increase of 5.8

percent over last year but down 47,000 MT from last month. The increase over last year is due to the return of seasonal rains in several sugarcane-producing states in mid-2025 and to the return of area to be harvested that had suffered the effects of severe drought two years ago. Although the harvest was expected to face delays due to devastating October rains and flooding in the states of Puebla, Veracruz, and San Luis Potosí, the delays have been much more severe than anticipated. Area harvested through January 3 has amounted to only 71,460 hectares, much lower than the initial CONADESUCÁ forecast of 139,018 and has led to a more conservative expected total year production total. Deliveries are increased over last year to 4.320 million MT on higher domestic sugar availability and lower prices but still burdened by increases in taxes on sweetened beverages. Total exports are about the same as projected last month and exports to the United States are constrained at 187,973 MT due to the low Export Limit under the Suspension Agreements implied by U.S. high sugar inventories.
